For salt removal from floors in winter

1. Vacuum rock salt
 2. use a recommended PH solution in water to neutralize salt and keep floor sheen.
To remove heavy grease from tiles and cement floors.
 1. Add 4-5 caps Palmolive dishwashing liquid per 1 gallon warm water.
 2. Mop solution over the area and wait 3-5 minutes for solution to work to break up grease.
 3. Use a microfiber mop to remove remaining grease from floors.
- Always check and inspect what you do to make sure areas or tasks are not missed.
